

OFFICE OF  
**THE ROSICRUCIAN**

MANCHESTER, N. H., Feb 3 1908  
A. V. T. Parcell

My Dear Sir & Pro-  
I was right-glad to hear  
from you again, and will  
write a few lines now  
to enclose with the receipt.  
Yes. I saw the Sci. American  
article on "Chess", about 2  
hours before your letter  
came yesterday (Calderas).  
I cannot place chess  
but I have spent much  
time with the Chess Kt.  
I saw problem over  
the board and have  
many solutions and  
have published many  
in the earlier nos. of N. 2.

I send you today K.C.  
Jan. 1904, and Let. N 2. just  
published this day.

There is no fee here on  
the Chedak so I return  
the 10 ds.

I do not know who  
to refer you to as to the  
Kabbalah. One of the  
best I ever met with  
when he was hungry was  
J. Kalston Skinner. of "Sources  
of Measur", fame. and he  
published quite a  
literature on it, and I  
suppose you may have  
some or all. I have  
all. as we were in corres-  
pondence for 15 years  
or more, and he men-  
tions me in his works.  
I want to pass several  
mornings with you, and  
then they will seem short.

I have many matters to  
 talking over with you  
 in Moscow and the  
 R. C. also. Nothing has  
 come to a head yet—  
 and will not till I  
 can see you and a  
 few others—

I have read Dr Buck  
little pamphlets and also  
his articles in "The Monist"  
etc.

I have not 4<sup>th</sup> & 5<sup>th</sup> models. But I will  
try again through my  
London friend and see  
if he can get a couple  
of set I have other  
calls for them.

I was not in January, 1908.

shall arrange to go there  
in April or May.

I hope you can have

Same time to John, and  
we will call on same  
"Bright-Mansions" I assure  
you, and it will be "a  
feast of reason and  
flow of soul"

I regret that the rainy day  
kept me away from  
the call I arranged  
with you.

I am sorry for your  
financial troubles.

I feared your delayed  
letters, for some good  
reason.

Will write more later  
on

Let me know when you  
go to Washington, D.C.

Yours fraternally  
J. B. Gould
